OUR LOCATION

6641 E. Ben White Blvd
Austin, TX 78744

HYDRAULIC UNIT REPAIR, REBUILD AND TESTING

Hydraulic component services include repairing cylinders, pumps, motors, valves, tanks, winches, cranes, hoists, hoses, fittings and power units. An LCRA hydraulic specialist will provide a quote for the repair upon request.

HYDRAULIC CYLINDER REPAIR

Keeping cylinders regularly serviced and maintained can improve your equipment's performance. Cylinder repair work includes disassembling parts, diagnosing the problem, repairing or replacing damaged parts, and rebuilding the cylinder.

HYDRAULIC PUMP AND MOTOR REPAIR

After analyzing your hydraulic motor and pump, we will make recommendations to improve your motor or pump's performance, and replace parts that are worn, broken or missing.

HYDRAULIC VALVE REPAIR

Disassembling and cleaning hydraulic valves allows us to inspect for flaws or defective components. After this thorough inspection, we will provide an estimate and recommendations for repairing, rebuilding or replacing your hydraulic valve.

HYDRAULIC HOSE ASSEMBLIES

Hose failures can result from advanced age, friction, pressure spikes and poor installation. Our experienced hydraulic experts can quickly determine the cause of failure, correct the issue and replace the hose assembly. We keep a wide selection of hoses, fittings and adapters on hand, and can manufacture custom replacement hoses, as needed.

CRANE REPAIR AND INSPECTION

Our skilled technicians can perform repairs on all crane components for all makes and models of crawler cranes, all-terrain cranes, truck-mounted cranes, rough terrain cranes, boom trucks and industrial cranes.

TRUCK AND TRAILER REPAIR

We are a full-service truck and trailer shop with the most current truck engine diagnostic software for Cummins, Caterpillar and Detroit. We also have Ford's OEM diagnostic tools and other aftermarket diagnostic equipment to assist in analyzing vehicles and equipment.

HEAVY EQUIPMENT AND FORKLIFT REPAIR

We can maintain, diagnose, troubleshoot and repair your heavy construction and material-handling equipment. Our repair services include mechanical and hydraulic services, and custom welding and fabricating new components.
